Νέα έκδοση της πλατφόρμας του Εκδότη ID Issuer
New ID Issuer platform release

The Enhanced Symbol Alphabet used for UIs generated was updated to include one more character, as below:

Enhanced Symbol Alphabet

For the codes, an enhanced alphabet was selected with wider range of symbols compared to simple alphabet or numeric values. The enhanced 63 symbol alphabet forms a subset of the ISO646:1991 immutable character set. This alphabet is used with every identifier issued by the ID Issuer. The alphabet consists of following symbols:

• Small letters a-z
• Capital letters A-Z
• Digits 0-9
• Character: '&' (ASCII 0x26) *New Addition*
